

Evidence Report: Reproducibility Investigation into AI Studio Prompt Deletion & Data Retention

bug

Adixanarchy

1 August 19, 2026, 10:49am

I am documenting a reproducible/testable claim concerning Google AI Studio prompt deletion and possible post-deletion recovery. I have prepared a structured evidence report separating official Google documentation, user-generated claims, technical hypotheses, and unresolved questions.

[Google_AI_Studio_Deletion_Evidence_Report_FINAL_v1.2_ADITYA_UPDA TED.pdf](#)

Google Drive file.

Please help: do the ai studio delete test so we can prove that google does not delete the chat

@Adixanarchy

I have thoroughly reviewed and permanently archived your post along with your attached PDF report on independent web archives (Internet Archive and Archive.today).

If you are approaching this in genuine good faith and not trolling, I truly appreciate you taking the time to structure my months of technical research, server audits, and public timeline into a formal investigative report. As you accurately documented in your report, every single piece of evidence—from the JSON pointer distinction to the “Blind Robot” Drive recovery—comes directly from my published case files.

Regarding the classification of the backend retention: remember that the Google Drive recovery tool operates strictly within cloud storage and has zero physical or architectural link to Google’s remote AI production servers. The fact that the active session instantly resumes with full token context proves that the backend process was never terminated upon UI deletion.

Nevertheless, compiling this into a structured 12-step reproducibility protocol for the community is a great step forward. Let’s see if Google’s engineering team finally steps up with a technical explanation instead of hiding behind silence.

We need to organize a mass community testing effort right here on the forum.

I have already created a dedicated topic specifically for this community campaign:

👉 **<https://discuss.ai.google.dev/t/please-help-do-the-ai-studio-delete-test-so-we-can-prove-that-google-does-not-delete-the-chat/174376>**

If multiple independent users upload their video evidence and timestamped confirmation emails into a single shared thread, it will make the evidence completely undeniable for any regulatory or legal review.

Google’s own developer (Lalit_Kumar, 2025) explicitly confirmed that the chat is not the JSON file in Google Drive, but merely metadata. Due to the loss of the metadata pointer, AI Studio simply “does not recognize” the session—which does not constitute a server-side deletion. This demonstrates that the “there is no such prompt” UI message is misleading, as the actual prompt continues to reside on Google’s backend servers.

Official forum reference: <https://discuss.ai.google.dev/t/saved-prompt-history-extension/101811>

Permanent archive: <https://archive.ph/ghAaS>

I hope you’re not a troll, because anyone can copy someone else’s idea... I don’t mean this in a bad way!

This ‘Evidence Report’ is a sanitized summary of my original research, heavily diluting the facts by labeling verifiable backend retention as ‘unproven.’ The author conveniently relies on my publicly archived audit trail to compile their findings but fails to acknowledge that the reproducibility of the backend data retention is a functional reality, not a mere ‘allegation’. Facts aren’t ‘unproven’ just because you’re too afraid to commit to the conclusion.

And regarding your ‘All Rights Reserved’ notice: don’t bother. My original technical documentation, the full audit trail, and the proof of the fraud were permanently recorded in independent archives long before you compiled this report. You can claim ownership of your summary, but you cannot copy the underlying research or the legacy of the primary discovery. It’s all archived, timestamped, and unignorable.

If you truly believe your report adds value, then upload your full screen-recording video of the deletion test, exactly as I demonstrated in my original posts. Currently, there is absolutely no video proof in your report—just empty talk. Put up or shut up.

Regarding your ‘All Rights Reserved’ notice: don’t bother. My original technical research, the full audit trail, and the proof of the backend fraud were permanently recorded and timestamped in independent archives months before you compiled this report. You can claim ownership of your summary, but you cannot steal the legacy of the primary discovery. It’s all archived, timestamped, and unignorable.

I have to admit, your ‘All Rights Reserved’ notice really pissed me off. You compiled this report using my research and archives, yet you have the nerve to claim ‘All Rights Reserved’ as if you’re the original author. You’re just parasitizing months of my work. Everything is archived and timestamped—you can’t steal the credit for a primary discovery that was documented months before your report existed.

[Bitu79](#)

11 August 19, 2026, 12:32pm

You’re nothing but a copycat thief. You compiled this report by stealing my months of research and archives, and now you have the nerve to slap an ‘All Rights Reserved’ notice on it? You didn’t discover anything—you’re just parasitizing my work. Everyone can see you’re a fraud. Sit down.

[@Adixanarchy](#)

If you are actually willing to collaborate instead of stealing my research, then upload a full, unedited video of the entire test to YouTube. That would make your work credible in my eyes. Right now, you just look like a troll trying to profit from my findings. Furthermore, regarding the timeline: I have permanently archived every step of this process, and I can prove beyond any doubt that I am the original discoverer to anyone, at any time. This is just for the sake of clarity.

I think you misunderstood what I meant by ‘competition.’ I wasn’t trying to compete with you at all. I actually meant that I’d like to join you and work together on the research. I’m interested in contributing and helping strengthen the evidence, not taking credit or turning this into a competition. I’d genuinely prefer that we work on this together.

[Bitu79](#)

16 August 19, 2026, 1:00pm

You didn’t ‘investigate’ anything—you just copy-pasted my months of research. Every single one of my original posts has a permanent archive link attached, proving I documented this fraud months before you existed. You’re trying to steal credit for my work while calling my facts ‘unproven’ to protect yourself—you’re nothing but a fraud. You can shove your ‘All Rights Reserved’ notice where the sun don’t shine.

A bit late for a ‘collaboration’ offer after you already slapped an ‘All Rights Reserved’ label on my stolen research and called my verifiable facts ‘unproven.’ My evidence is already fully documented, archived, and timestamped—I don’t need a partner who tries to trademark my work. Keep your ‘collaboration’ for someone who doesn’t know how to read timestamps.

Since you claim to be a researcher, prove it: upload your full, unedited video of the deletion test, exactly as I demonstrated. If you can’t back up your own report with proof, you’re just another troll. Put up or shut up.

[Adixanarchy](#)

18 August 19, 2026, 1:06pm

Okay, I understand your concern regarding the ‘All Rights Reserved’ notice. I’m willing to remove that notice from the report and upload a version without an exclusive copyright claim. My intention is not to claim ownership over your original research. I’d still like to keep the report as an independent compilation/investigation and properly acknowledge your earlier work where applicable

[Bitu79](#)

19 August 19, 2026, 1:11pm

If you want to maintain any credibility, don’t just ‘remove’ the notice—rewrite the report to explicitly credit me as the original discoverer and primary researcher. You built this entire ‘investigation’ on my months of work; if you want it to be seen as an independent compilation, you must cite the source properly. Anything less is just another attempt to polish a stolen product. Upload the corrected version with proper attribution and link it here—I’ll be watching.

Hey, here's the updated version of the report:

<https://drive.google.com/file/d/1MD0QbeePIIHWesUEc9EAm9MPViNAJBFT/view?usp=drivesdk>. I've also updated the original post accordingly. I removed the previous copyright/"All Rights Reserved" notice and added an acknowledgment for your research and contributions. Please have a look.

[Bitu79](#)

22 August 19, 2026, 1:34pm

[@Adixanarchy](#)

I appreciate you listening to the feedback, removing the 'All Rights Reserved' claim, and adding the proper **Source Acknowledgment** crediting **Bitu79** on the cover page and footer of Version 1.2. Proper attribution is the bare minimum when compiling someone else's primary research.

For the record: my original technical documentation, the full audit trail, and the proof of the backend data fraud were permanently recorded and timestamped across independent web archives (Internet Archive, Ghostarchive, Archive.today) months before this compilation was assembled. The primary discovery timeline is immutable and fully proven.

Now that the authorship credit is set straight, the main requirement remains: if you want your report to have real engineering credibility, **upload a full, unedited screen-recording video of the deletion test**. A PDF summary with links is just talk—an unedited video recording is what turns a claim into undeniable technical proof.

Please upload your full video demonstration and timestamped Google recovery email directly to my dedicated community testing thread here:

👉 <https://discuss.ai.google.dev/t/please-help-do-the-ai-studio-delete-test-so-we-can-prove-that-google-does-not-delete-the-chat/174376>

Let's see if Google's engineering team finally steps up with an official technical explanation instead of hiding behind silence.

[Bitu79](#)

23 August 19, 2026, 1:37pm

Let me give you a hint as to why Google refuses to answer my documented backend flaw, and why they haven't banned me yet: I sent them formal, registered notifications directly to Mountain View months ago. They are fully aware of the incident.

They know very well what it looks like in a legal proceeding if they ban me now—silencing a whistleblower whose evidence is already sitting on their Data Protection Officer's (DPO) desk. I opened a separate thread dedicated to this exact correspondence; maybe you should do some real research and go find it. When are you finally going to upload the video?

[Bitu79](#)

24 August 19, 2026, 1:40pm

The updated PDF report (v1.2) has been preserved on the Internet Archive here:
