

Google is fully aware of the AI Studio data fraud, as the Issue Tracker has officially accepted my report

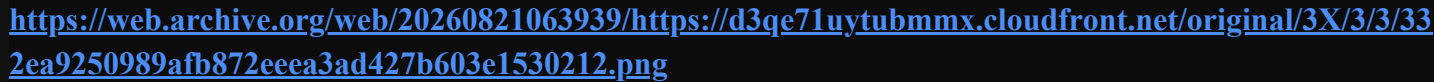

[feature_request](#)

1 August 21, 2026, 6:37am

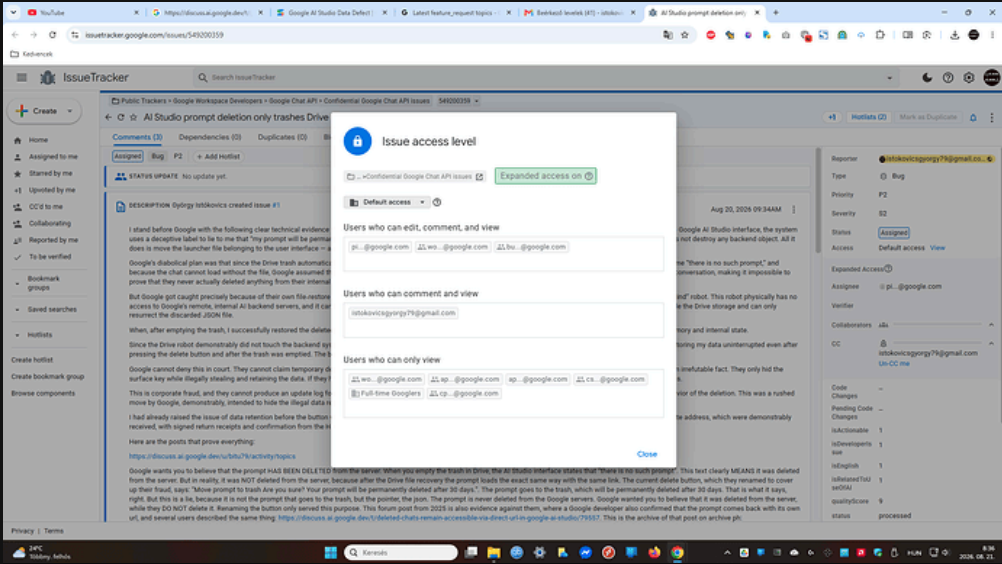

Here is the official confirmation email from Google Issue Tracker regarding **Issue 549200359**. Google's internal system has officially accepted and assigned the ticket about the backend data retention bug, so the ~~problem very much~~ exists within Google's architecture. They cannot deny it. Since this tracker is not publicly visible, I am sharing the screenshots here on the forum. Google can no longer pretend they don't know about this, as I have reported it multiple times and they have official knowledge of the situation.

The Issue Tracker is indeed just an automated piece of junk, an internal ticketing system that proves nothing regarding the fact of fraud. However, it was absolutely perfect for ensuring that the Google-side formal notice (Formal Notice / Legal Knowledge) was irrefutably established.

By receiving the registered letters and having the automated Issue Tracker log the report, Google has officially acquired legal knowledge of the situation.

Since Google knows about it, yet remains completely silent (hushing it up) officially and does not stop the backend system's illegal data retention, their conduct before civil law constitutes intentional fraud and willful misconduct.

[Evidence Report: Reproducibility Investigation into AI Studio Prompt Deletion & Data Retention](#)

Warning to Forum Administrators and Google Developers: It is your absolute duty to provide an official response, this is not a game!

I am done with your six months of silence and the pathetic games running in the background, like deploying 3-day-old fake Indian alt accounts! It is your absolute duty to step up and provide an official technical response right here in this public forum. Or do you treat this like a playground? Are you seriously trying to drag me to court? Because if you are, you are going to lose and get absolutely crushed!

If necessary, I will seek to have the free AI Studio closed because it operates unlawfully, and your backend is fundamentally incapable of deleting the chat due to its architecture. The JSON file on Google Drive is merely a pointer. When a user deletes on the UI, only this pointer is removed, while the actual chat and the token context remain on the backend servers. This design makes the system fundamentally non-compliant with GDPR by design as it cannot meet the requirements due to its core architecture.

There is no need to overcomplicate this: Google Drive and the backend are completely disconnected from each other. Why haven't you reprogrammed the software architecture to send a deletion command to the backend as well when the delete button is pressed, instead of just making the JSON file disappear? The answer is obvious: because you don't even want to fix it!

If you continue to ignore this and refuse to respond to me, I will use this ongoing silence against you in court! You will face significantly heavier penalties. This fraud affects millions of people. An official response is expected, or see you in court!

WARNING TO FORUM ADMINISTRATORS AND Google DEVELOPERS:

IT IS YOUR ABSOLUTE DUTY TO PROVIDE AN OFFICIAL RESPONSE!

I AM DONE WITH YOUR SIX MONTHS OF SILENCE AND THE PATHETIC GAMES RUNNING IN THE BACKGROUND, LIKE DEPLOYING 3-DAY-OLD FAKE INDIAN ALT ACCOUNTS!

IT IS YOUR ABSOLUTE DUTY TO STEP UP AND PROVIDE AN OFFICIAL TECHNICAL RESPONSE RIGHT HERE IN THIS PUBLIC FORUM. OR DO YOU TREAT THIS LIKE A PLAYGROUND? ARE YOU SERIOUSLY TRYING TO DRAG ME TO COURT? BECAUSE IF YOU ARE, YOU ARE GOING TO LOSE AND GET ABSOLUTELY CRUSHED!

YOUR SYSTEM IS FUNDAMENTALLY NON-COMPLIANT WITH GDPR BY DESIGN BECAUSE YOUR ARCHITECTURE MAKES DELETION IMPOSSIBLE!

USER INTERFACE
When a user presses DELETE on the UI

GOOGLE DRIVE (JSON POINTER)
chat.json

BACKEND SERVERS
• ACTUAL CHAT DATA
• TOKEN CONTEXT
• USER DATA
• CONVERSATION HISTORY

THIS DESIGN IS FRAUDULENT BY DESIGN!
IT CANNOT MEET GDPR REQUIREMENTS DUE TO ITS CORE ARCHITECTURE!

ONLY THIS POINTER IS REMOVED! **BUT ALL THE DATA REMAINS HERE!**

THERE IS NO NEED TO OVERCOMPLICATE THIS:
GOOGLE DRIVE AND THE BACKEND ARE COMPLETELY DISCONNECTED FROM EACH OTHER.

WHY HAVEN'T YOU REPROGRAMMED THE SOFTWARE ARCHITECTURE TO SEND A DELETION COMMAND TO THE BACKEND AS WELL WHEN THE DELETE BUTTON IS PRESSED, INSTEAD OF JUST MAKING THE JSON FILE DISAPPEAR?

THE ANSWER IS OBVIOUS:
BECAUSE YOU DON'T EVEN WANT TO FIX IT!

IF YOU CONTINUE TO IGNORE THIS AND REFUSE TO RESPOND TO ME, I WILL USE THIS ONGOING SILENCE AGAINST YOU IN COURT!

YOU WILL FACE SIGNIFICANTLY HEAVIER PENALTIES. THIS FRAUD AFFECTS MILLIONS OF PEOPLE.

AN OFFICIAL RESPONSE IS EXPECTED, OR SEE YOU IN COURT!

Google should be thoroughly ashamed of themselves, because they received the registered letter with acknowledgment of receipt in Mountain View, their DPO has been notified multiple times as well, I reported it in the Issue Tracker, and on this forum too. They cannot deny it, I demand that you answer, you dumbasses!!!
