Dear Sab / Google Drive Support,

You completely misunderstood my report because this is an automated response. I am NOT asking you to recover a lost file for me. I am a whistleblower who has filed a criminal complaint (Hungarian Police Case No: 02010/3023-5/2026. bü.) regarding a critical GDPR Article 17 violation.

My report proves that your "Delete" button is a placebo. The evidence shows that if a user deletes a chat and empties the Drive trash, the Google Drive File Recovery tool can still resurrect the .json file 25 days later. The fact that the file can be restored proves that the automated data destruction (TTL) NEVER executed.

Do not send me troubleshooting steps. Your automated response dodging responsibility by claiming "AI Studio is not our scope" is unacceptable, as AI Studio directly utilizes the Drive architecture for this flawed deletion process.

I demand this ticket be escalated immediately to your Legal Department.

Hello György,

Thank you for contacting Google Drive Support. I hope you're doing well.

My name is Sab, and I'm reaching out to assist you with your concern. I understand that you're trying to recover a JSON file that was deleted from your Google Drive. No worries—I'll do my best to assist you.

First, I'd like to set the proper expectations regarding the scope of our support. Our support is limited to Google Drive-related concerns and does not extend to Google AI Studio issues.

Additionally, our file recovery tool can only recover files that meet all of the following criteria:

1. The file was uploaded to or created in Google Drive.
2. You are the owner of the deleted file (the uploader or creator using this account).
3. The file was deleted from Google Drive.
4. The file was deleted within the past 25 days.

To help us further investigate your concern, could you please clarify the following:

- Was the JSON file previously visible and accessible in your Google Drive?
 - If so, please provide the file link, if available.
- Was the JSON file an actual file that was uploaded to or created in Google Drive, or a cache file?
- Please provide a screenshot of your [Google Drive Activity panel](#) showing the activity log for the file in question.

Once we have this information, we can determine whether the file meets the requirements for recovery and advise you on the next steps.

We look forward to hearing from you.

Thank you,
Sab
The Google Drive team
